# **ROV-5815 RFID Soft Wash Label**

Ultra-high frequency soft washing label, more than 200 industrial washing life, can withstand 60 Bars pressure, stable and reliable radio frequency performance;

The same label can be applied to global frequency requirements (including Europe, America, and China);

Warranty 200 industrial washing;

Compared with internationally similar washing labels, this product has excellent reading distance and reliable performance.

## Model: 10-Laundry5815

Installation method: sewing installation or installation with woven label sleeveAdvantage.

#### Advantage:

- Really reach and exceed 200 industrial washing life;
- 4 All materials and designs have undergone reliability verification and application verification;

4 100% power verification and write verification before leaving the factory.

#### **Main Feature:**

- The soft washing label can be customized according to customer requirements;
- Soft, does not hurt textiles, feels good;
- The size of the chip module is one of the smallest sizes on the international market;
- Can withstand 60Bars pressure;

It belongs to the few models in the global market that can withstand 180 degrees and 30 minutes, 200 times of pre-drying process;

Impinj chip, with spectrum modulation function, can achieve excellent group reading performance through optimization of reader and software in system application.

## **Applications:**

H Industrial washing management; linen leasing management; standard clothing management and washing

management; work clothes rental and washing management; hospital linen and washing management; military clothing and

quilt management; railway linen management and washing management; police clothing management; personnel

Management; access control management; fire clothing and soft material management; other applications that require soft

and pressure-resistant products.

# characteristic:

A : :	EDC Class 1 Car 2 18 0 19000 CC
Air interface	EPC Class1 Gen2, ISO18000-6C
frequency	845~ 950MHz (common worldwide)
chip	Impinj R6P
Storage area	EPC 96bits, User 32bits
Read and write	Yes
data storage	20 years
Service life and	200 industrial washings or 2 years (whichever comes first)
Material	textile
size	Length 58mm x width 15mm x maximum thickness 1.5 mm (the
	maximum thickness is only at the chip location)
storage	-40°C~ +85 °C
Operating	1) Washing: 90°C(194oF), 15 minutes, 200 times
temperature	2) High temperature pre-drying: 180°C(320oF), 30 minutes, 200 times
-	3) Ironing: 180°C(356oF), 10 seconds, 200 times
	4) High temperature disinfection: 135°C(275oF), 20 minutes, 200 times
	(This product does not support the medical MRI test, the company has
	another product that can pass the MRI test)
Peak pressure	60 bars
Product type	single
Installation	Sewing in the curling, or in the woven label sleeve (do not sew on the
method	metal thread or chip module during sewing)
weight	About 0.6 g/piece
Packing	Anti-static bag and carton packaging
colour	white
Power supply	Passive
Chemical	Can withstand all chemicals in the normal industrial washing process
RoHS	meets the
Reading distance	Fixed type: over 5.5 meters (ERP=2W)
distance	Handset: more than 2 meters (using ATID AT880 handheld)
Polarization	Linear polarization
